The «info-tri» sorting information label

Guide on the new sorting symbols in the textile industry

Background

This guide covers all the recommendations that you will need in order to affix the sorting symbol, that is now compulsory, onto your clothing, household linen and footwear products.

_Objective

To respond to the information required by your customers and to ensure that you meet the new requirements of French regulations (article 17 of the French law on Fighting Against Waste and for the Circular Economy (AGEC) and Decree n° 2021-835 of 29 June 2021).

_What does the law say?

Article 17 of the French AGEC law and its Decree n° 2021-835 of 29 June 2021 set the guidelines on the information for customers in relation to sorting symbols.

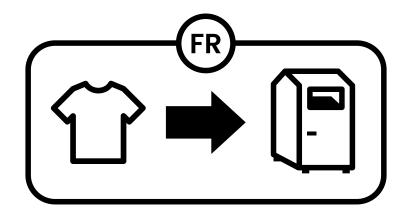

Points to bear in mind:

2 elements must be displayed:

• The Triman symbol

• Information «specifying the sorting methods or deposit of waste resulting from the product» («info-tri» sorting information label) «on the product, its packaging, or failing this, contained in other documents supplied with the product (manual, instructions for use, etc.)».

_What does Decree n° 2021-835 of 29 June 2021 say?

- The Triman symbol and sorting-info cannot be dissociated (are «adjoined»)
- The Triman symbol and sorting-info must be physically present when the customer purchases the item. These can be displayed on different media: on the textile label showing the fibre composition, on the temporary label (such as the cardboard label or «hangtag»), printed or embroidered onto the product, on the packaging in which the product is sold to customers (name tag, box, bag, etc.) or in the form of a sticker.

• The exception: electronic format

- > When the surface area of a product or its packaging is **equal or less than**10 cm²: electronic Triman symbol and sorting-info
- > When the surface area of a product or its packaging is **between 10 cm² and**20 cm²: electronic Triman symbol and sorting info on the product

Any questions?Go to our FAQ page.

The **winfo-tri** sorting information label_Background

_Schedule

The «info-tri» sorting information label is:

- Compulsory as from 1 January 2022. From this date onwards and by 1 February 2023
 at the latest (or 1 August 2023 for products manufactured or imported before
 1 February 2023) the information must be affixed on all items of clothing, household
 linen and footwear.
- Governed by strict rules validated by the public authorities. The symbols and their rules of use have been validated by the French Ministry for the Ecological Transition.
 All companies that place clothing, household linen and footwear onto the French market are subject to these rules.
- Tested and approved by customers.

^{*}Established by Refashion, the eco-organisation in charge of the EPR (Extended Producer Responsibility) process for clothing, household linen and footwear.

Refashion

Recommended symbols

_Principle

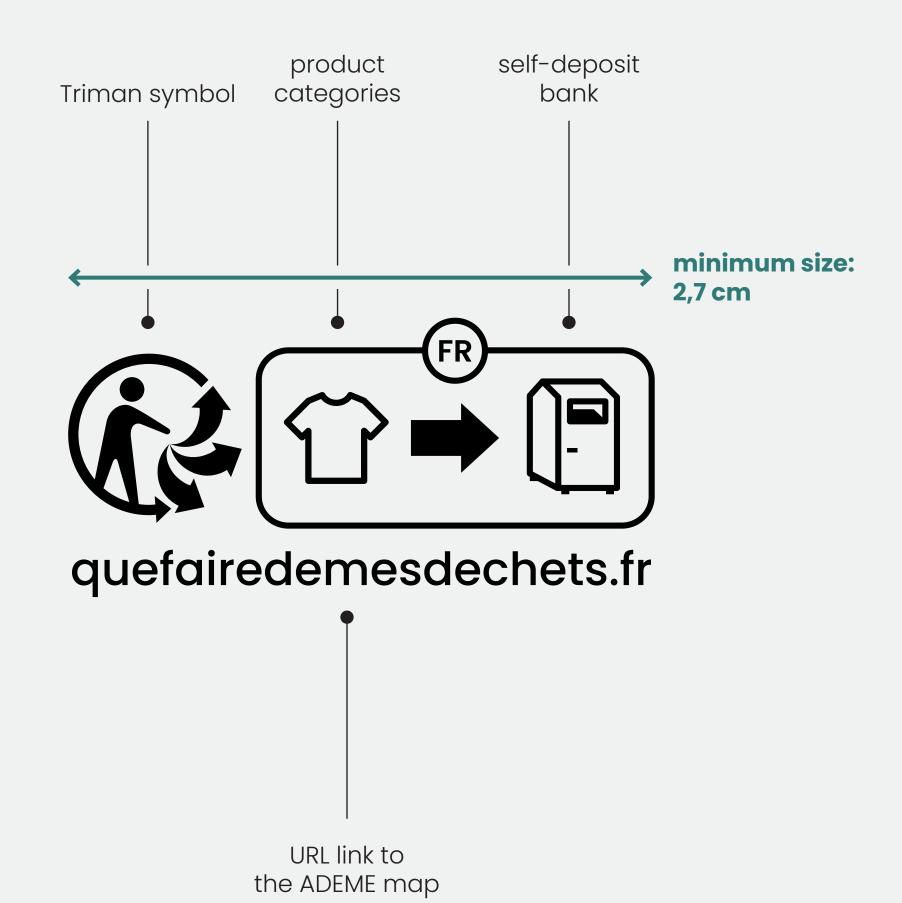

A simple symbol that requires no translation, that is legible when small-sized so that it can be displayed on the textile label showing the fabric composition and used horizontally or vertically.

_Composition

- The Triman symbol is placed first
- A pictogram symbolising one **product category**:
 - > clothing (t-shirt)
 - > household linen (folded towel)
 - > footwear (tied derby shoes)

It is possible to display just one product category or all three together.

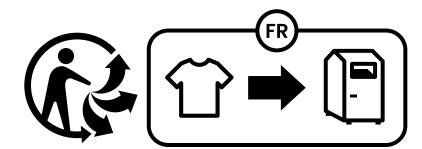

- The **self-deposit bank** symbolised by the pictogram of a container
- The URL link to the Ademe's website
- The letters FR to specify that this measure is governed by French regulations.

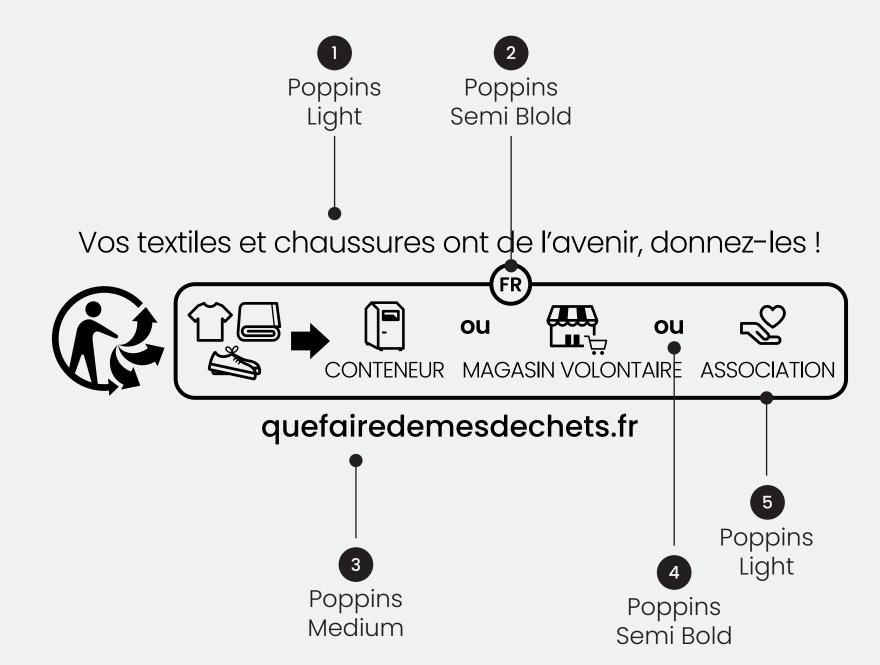

Graphic charter to be followed

_ Typography

The typography used is Poppins:

Poppins Light	abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ
Poppins Medium	abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ
Poppins Semi-Bold	abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ

- Phrase explaining sorting and donating: Poppins Light
- **FR reference:** Poppins Semi Bold
- 3 URL: Poppins Medium
- 4 **«where»**: Poppins Semi Bold
- Word describing the self-deposit point: Poppind Light, in capital letters

The «info-tri» sorting information label_Charte graphique à respecter

_ Protection zone

The «info-tri» sorting information label protection zone is based on the thickness of the border multiplied by 2.

- Thickness of the border = **x**
- Width of protection zone = 2x

This space must remain empty and must not contain any element that would disturb the legibility of the «info-tri» sorting information label.

When the background is disturbed, this zone is used as a blank block.
